

There is an outbreak of the **Zika Virus Disease** in Central and South America, Africa, Southeast Asia !

If you are coming from an outbreak region and you are concerned, speak to a Quarantine Officer

For travelers who have visited outbreak regions (cautions upon returning to Japan)

- You do not need to become overly concerned if you have been bitten by a mosquito; **however, individuals who are concerned and who are exhibiting symptoms, such as a fever, should speak to a Quarantine Officer.**
- To prevent the spread of the Zika Virus in Japan, **take measures to avoid being bitten by mosquitos for at least 2 weeks after returning to Japan,** by regularly applying bug repellent etc.

- If you are returning from an outbreak region, you should use a condom if you engage in sex, or refrain from sex altogether for **at least 6 months** (if your partner is pregnant, during her pregnancy) after your return to Japan, **regardless if there are clinical symptoms or not.**
- **If you are concerned and exhibiting clinical symptom, seek guidance at your local health center.**

For more information on precautions for your return to Japan →
