## 2021年度 関西学院高等部 入学試験 英語 リスニングテスト2（原稿）

《 リスニングテスト2 》

問題用紙その4の<リスニングテスト2>を見て下さい。

今から、ロケットの発射の場面について、2人のアナウンサーがやりとりをします。問題用紙その4にはそのやりとりについて、5つの質問が書かれています。その質問を読みながら2度会話を聞いて答えてください。なお質問は読まれません。では、10秒後に始めます。

M=男性アナウンサー F=女性アナウンサー

Countdown manager: 5...4...3...2...1... Lift-off!

M: America's first rocket to the moon in 60 years has taken off!

F: This is so exciting!

M: Yes. This is a moment that everyone will remember.

F: Okay, so let's tell our listeners a little about this trip.

M: All right. The rocket has three team members, 2 men and 1 woman. They will first fly for 3 hours before they get to the moon. They will arrive at the moon at 4:00 pm.

F: That's very fast! In the past, it took 3 days to get to the moon, didn't it?

M: That's right. But this time, they are flying in the newest rocket. It is much faster than the older rockets.

F: I see. Then, what will the members do when they get to the moon?

M: After they are close to the moon, they will go around it 4 times. After that, the rocket will go down to the moon.

F: That's great. What will they do there?

M: The members will try to make some simple buildings. If they can make them, then next time they will start to make a town. Then, the members will try to find water. If they can find some, the next trip will be much easier. Finally, the members will use a special kind of car to drive around the moon. Because there are no roads, they can go almost anywhere they want!

F: That sounds wonderful. I know that I would like to drive on the moon someday. Will the members do anything else before they leave the moon?

M: Yes. They plan to collect rocks and take some pictures. They will also leave a box that has some messages which were written by school children from around the world.

F: That sounds like a busy plan. So, when are they coming back?

M: The members will come back after 5 days. They will be back home on July 9th at 11:00am.

F: Well, I hope that their trip goes well!
