## A Consideration of Georges Balandier's Dynamic Sociology

### ABSTRACT

This article is written as an expression of my admiration for Balandier's achievement in the fields of anthropology and sociology. He gave us a key to understand African social reality. I believe in his kind guidance for us, Japanese sociologists. He taught us what the dynamic structure of the Third World is.

**Key words:** a global appreciation of dynamic reality; total, intensive understanding of the Third World; sociologists' tasks towards Human Society.
